EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Scott A. 3. The application has been amended as follow:
Claim 11 line 15, the word "flow" has been replaced with the phrase -- flow; --.

Allowable Subject Matter

4. Claim 11-20 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:

While Liou et al. teaches a process for generating a performance model from a functional model for a system including a plurality of distributed hardware and software entities that engage to provide a service to at least one user, distributing representative

system requests in a finite number of groups and identifying, for each request group, a corresponding execution flow, the distributing of the requests being determined by a service being called upon and by characteristics of customer specific behavior, and the execution flow for each request group corresponding to a software entity execution linking, in sequence and/or in parallel, induced by a group request, formalizing the execution flow using a notation identifying causal relationships between different software entities of the system that are involved in the execution flows, developing an intermediate model that comprises, in addition to the formalized execution flows, a resource specification quantifying resources available from physical hardware of the system, and an environment specification quantifying the amount of requests generated by said at least user, and automating conversion of the developed intermediate model into a performance model, nor the prior art of record discloses a method for modeling of a differential bus device, including:

(Claim 11) “formalizing the execution flow using ... the notation including resource consumption metrics, attributing specific resource consumption values in correspondence to a respective execution flow”,

in combination with the remaining elements and features of the claimed invention.

It is for these reasons that the applicant's invention defines over the prior art of record.

Affidavits

6. The affidavit filed on 01/07/2009 under 37 CFR 1.132 has been acknowledged by the Examiner.
